   7.1 Departmental Cost Summary

   7.2 British Standards

22 MAY 1981

1. Scope

This Equipment Note gives guidance on the equipment required for all ward units in a district general hospital. Some variations may be required according to the speciality but it is intended to be read in conjunction with Hospital Building Note No. 4 (Revised) on the design of a 30-bed nursing unit. It does not cover Maternity, Children's or Psychiatric Wards, Intensive Therapy Units, Isolation Wards, Barrier Nursing Units, Geriatric Wards or Deep-plan ward units.

2. General Consideration on the Use of Equipment Notes

Equipment Note No. 1 (Equipping a hospital building) provides an introduction to the series of departmental Equipment Notes, advice on their application, and guidance on the task of preparing equipment schedules for individual building projects. This departmental Equipment Note is intended to be used within the general planning frame-work set out in Equipment Note No. 1 and in the manner described therein.

The following method of classifying equipment, which is explained in more detail in Hospital Equipment Note No. 1, is used throughout the Equipment Notes:—

The term "equipment" covers all items necessary for the functioning of the hospital and includes both non-technical (e.g. furniture) and technical equipment. Short term consumable supplies such as fuel, stationery, food, drugs and dressings are not included.

To facilitate computer processing the equipment listed in this note is classified into four groups:—

Group 1: Items usually supplied and fixed by the contractor for the works.

Group 2: Items having a permanent or semi-permanent location and having a significant effect on space and/or structural requirements, i.e. those supplied by the hospital authorities and fixed by the contractor for works (previously Group IIa).

Group 3: Items having a permanent or semi-permanent location and having a significant effect on space and/or structural requirements i.e. those supplied by the hospital authority and put in position by them or on their instructions outside the general construction contract (previously Group IIb).

Group 4: Smaller items, usually storage items, supplied and put in position by the hospital authority (previously Group III).

3. Special Considerations in Respect of this Note

The equipment detailed in this Note is regarded as suitable for the Ward Unit described in Building Note No. 4 (Revised) and has been listed in room (or space) sequence conforming to that Building Note. The lists are drawn up in such a way that they can be applied to units of varying sizes and of varying designs within the context of the Building Note. To achieve this flexibility, the method of applying the lists will vary, thus:—

3.1 for ward accommodation, since the combination of single and multiple bed wards will vary at local choice, the equipment has been shown on a unit basis, i.e. per bed space or per bay or ward as appropriate, so enabling any arrangement to be catered for;

3.2 for recurring rooms such as single bed wards, toilets and the like, the list shows the equipment for one room and this will require to be multiplied by the number of such rooms included in the schedule of accommodation;

3.3 in the case of the catering services, the day room, the visitors' waiting area and the list of departmental items, equipment is related to the requirements of a specific number of beds and suitable adjustments will need to be made for smaller or greater numbers;

3.4 some minor variations may also be required as between male and female medical and surgical wards.

3.5 Some fixed items of equipment (Group 1) have already been mentioned (and costed) in the Building Note, but it has been thought useful to include them again in the Equipment Note which represents the results of a comprehensive review of the requirements. Reference should, however, be made to the Building Note—Part VI. Engineering Services—for further information on the mechanical services and electrical installation. Structural elements, floor finishes, non specialised heating and lighting fittings and similar items which are basic to any building are not included in the Equipment Note; neither are window blinds and window curtain tracks since the requirements may vary with local circumstances.

3.6 It is for individual hospital authorities to make rules about smoking in the hospital under their control and management (see Departmental Memo HM(63) 43) but where it is decided to provide ashtrays these should be of the pedestal type and restricted to areas used by the general public.

3.7 Throughout the schedule, for the sake of uniformity, references to paper towel dispensers are associated with sack holders. Suitable adjustments will need to be made where linen towels are to be used.

4. Cost

4.1 Guidance on the cost of equipping ward units to the standard shown in this schedule is given against the list of equipment for each room. Departmental cost summaries for a range of sizes are shown in Appendix 7.1 to this Note. In using these cost figures, the considerations referred to in Section IV of Equipment Note No. 1 should be borne in mind.

4.2 The cost figures in this schedule and in the Appendix are related only to Groups 2, 3 and 4 equipment. As a matter of convenience, Group 1 items of a specialised nature are listed in the room schedules but these have been taken into account in the cost allowance for construction (including engineering) in the appropriate Cost Section of Appendix 7 of Hospital Building Procedure Note No. 6 (Capricode).

4.3 A cost allowance has been made in this note for both single and multiple bed-areas to be totally equipped with Kings Fund beds. Adjustment of this cost allowance would be expected, however, in relation to wards where this type of bed is not entirely appropriate.

4.4 Cost allowances throughout the summary (Appendix 7.1) include figures for catering based on the room cost of £212 pantry for each 30 beds. Other catering systems may be provided for by substituting the various costing for catering alternatives shown in the body of this Hospital Equipment Note.

5.17 Departmental Items.

Generally, items are shown throughout the lists in the rooms where they will normally be found in the department. In addition, the items set out below relate to the Ward Unit as a whole, listed under Linen, General items and Central Sterile Supply Department items.

The items under 5.17.1 will probably be supplied from the Central Linen Service and the quantities shown (and cost) are intended to give guidance on the requirements of an individual Ward Unit of 30 beds, but the total quantities held in the Central Linen Department will depend on various factors.

The items under 5.17.2 are also for general guidance.

The items listed under 5.17.3 will be obtained from the Central Sterile Supply Department. Therefore an assessment of the basic requirements (and cost) for a 30-bed Ward Unit has not been made, but quantities will be shown in the Equipment Note for a CSSD in due course. The list is intended to give an indication of the type and variety of items which it has been assumed will be obtained from the CSSD. The cost of these will also be included under the CSSD.

7.1 Departmental Cost Summary

To be read in conjunction with the explanatory notes in section 4 of this Equipment Note and Section 1V of Hospital Equipment Note No. 1.

The room cost guide figures for basic equipment (Groups 2, 3 and 4) applied to standard schedules of basic accommodation for departments of various sizes, suggest departmental equipment cost totals of the following order.

Number of Beds served							
30	60	120	180	240	300	360	420
£8,591	£17,217	£34,435	£51,652	£68,870	£86,087	£103,305	£120,522

Number of Beds served				
480	540	600	660	720
£137,740	£154,957	£172,175	£189,392	£206,610

In these totals no account is taken of the following:—

1. Items supplied from the Central Sterile Supply Department;
2. Equipment required for basic accommodation additional to the basic list, some guidance on which is given under the appropriate rooms;
3. Equipment required in "additional accommodation", cost guides for which are shown on the appropriate pages as for basic accommodation.

7.2 British Standards

Guidance is given below on the British Standards considered appropriate for certain items listed in this Equipment Note. However, it is not the intention to imply that an item in a material other than that to which the British Standard relates is necessarily inappropriate.
